

Inspection/Analysis/Monitoring Fees

The Minnehaha Creek Watershed District is committed to a leadership role in protecting, improving and managing the surface waters and affiliated groundwater resources within the District, including their relationships to the ecosystems of which they are an integral part. We achieve our mission through regulation, capital projects, education, cooperative endeavors, and other programs based on sound science, innovative thinking, an informed and engaged constituency, and the cost effective use of public funds.

A site inspection and monitoring by District staff will be performed where the activity involves:

- a commercial/industrial/multi-family residential development
- a single family residential development greater than 5 acres or of any size if within the Minnehaha Creek subwatershed
- any alteration of a floodplain or wetland
- dredging within the beds, banks or shores of any protected water or wetland
- a violation
- any project which in the judgment of the District staff should be inspected due to project location, scope, or construction techniques

In these cases, the applicant shall pay to the District a fee equal to the actual costs of field inspection of the work, including investigation of the area affected by the work, analysis of the work, and any subsequent monitoring of the work, which in the case of a violation shall be at least \$35.
